## Summary

Software Engineer (ex-Amazon) with one year building scalable systems in **Python**, **C++**, and AWS cloud infrastructure. Strong fundamentals in debugging, root-cause analysis, and **Git**-based version control. Co-authored peer-reviewed deepfake-detection research achieving **95%** F1-score. Focused on code quality, ownership, and continuous improvement across full-stack personal projects.

## Work Experience

### Amazon Development Centre

Support Operations Specialist

Bengaluru, Karnataka

Feb 2025 – Feb 2026

- Reduced manual operational effort by **30%** by developing **Python** automation scripts for workflows
- Performed root cause analysis on production incidents by analyzing **Linux** system logs daily
- Built and maintained **CI/CD** pipelines, improving deployment quality and reliability across **15+** workflows
- Streamlined operational decision-making by writing **SQL** queries, reducing data-analysis turnaround time by **20%**
- Managed **AWS** EC2 infrastructure, ensuring stability and quality across production automation workloads reliably

### Varcons Technologies Pvt Ltd

Software Developer Intern (Full Stack)

Bengaluru, Karnataka

Aug 2023 – Oct 2023

- Reduced page load time by **20%** by developing **React** components and implementing lazy loading
- Reduced API latency by **25%** by building REST APIs with **Node.js** and PostgreSQL indexes
- Improved application stability by debugging production issues and supporting **AWS EC2** based deployments
- Used **Git** for version control while documenting REST APIs and **CI/CD** workflows for team

## Projects

### Hyperlocal Influencer Marketing Platform [\[GitHub\]](#)

React.js, Node.js, Express.js, MongoDB, Redis, AWS, JWT

Feb 2026 – May 2026

- Developed a platform using **React.js**, Node.js, Express.js, and MongoDB via REST APIs
- Implemented recommendation and geospatial APIs with **MongoDB** and AWS, improving discovery relevance by **20%**
- Built JWT authentication and role-based access control using **Node.js**, restricting unauthorized platform access
- Designed **15+** REST APIs with Redis caching, reducing database load and improving scalability

### VarifAI: Deepfake Detection [\[GitHub\]](#)

Python, Django REST, PyTorch, OpenCV, AWS

Jan 2024 – May 2024

- 95%** accuracy, measured by F1-score on **10,000+** samples, by building an AI-powered deepfake detection system
- Designed a scalable backend using **Django REST**, enabling ML model inference through optimized REST APIs
- Trained **ResNeXt** and LSTM models, applying evaluation metrics to optimize classification performance reliably
- Deployed a full-stack system on **AWS** (EC2, S3, PostgreSQL), cutting latency by **2 hours**

### TechTune Motors [\[GitHub\]](#)

React.js, Node.js, Express.js, PostgreSQL

Oct 2023 – Nov 2023

- Reduced REST API response time by **25%** through **PostgreSQL** indexing and backend caching
- Designed scalable APIs with validation and rate limiting using **Node.js**, improving reliability by **20%**
- Authored integration and regression test documentation validating correctness across **CI/CD** and AWS deployments

## Skills

|                        |                                                       |
|------------------------|-------------------------------------------------------|
| Languages              | C/C++, Python, JavaScript, SQL                        |
| Frameworks & Libraries | React, Node.js, Express.js, Django REST               |
| Databases              | PostgreSQL, MySQL, MongoDB, Redis                     |
| Cloud & DevOps         | AWS EC2, AWS S3, Docker, CI/CD                        |
| Concepts               | Data Structures & Algorithms, System Design, Git, OOP |

## Education

### Visvesvaraya Technological University, Karnataka

Bachelor of Engineering (B.E.) in Computer Science and Engineering

CGPA: 7.9/10

## Publication and Achievement

- VarifAI Research Publication, Gradiva Review Journal (May 2024)
- Solved 500+ Data Structures and Algorithms problems across competitive coding platforms [\[LeetCode\]](#) | [\[GFG\]](#)
